Projects

1. Merchant Payment Form Redesign - Fintech

Redesigned the payment experience through heuristic evaluation, competitive benchmarking, and usability testing, reducing drop-off rates by 40%.

2. Revenue Cycle Management System - Healthcare

Redesigned the claim processing portal leveraging cockpit interface principles, reducing cognitive load and boosting processing efficiency by 30%.

3. Personal Portfolio Website

A collection of my work focused on creating intuitive, user-friendly solutions through design thinking and problem-solving.

SKILLS

- Figma and Vibe Design
- Heuristic Testing
- Secondary Research
- Competitive Analysis
- Usability Testing
- Design System

TOOLS

- Figma and Stitch
- Gemini and Claude
- Stitch and Loveable
- UX Pilot

TRAINING & CERTIFICATIONS

- Network Management and Web Development
- Software Reliability

PARTICIPATIONS

Workshop on Heuristic Testing.

Workshop on UX psychology.

Seminar on Software Reliability.

HOBBIES

Watching old movies
